BUSINESS PARTNER

SIMPLE, OPTIMIZED INTEGRATION

Magic xpi Integration Platform's native **SAP Business One** connector supports a wide range of integration solutions between your ERP and other business systems.

The pre-built, SAP B1 connector, with its code-free, drag and drop approach, enables developers to complete business-critical integration projects quickly and easily.

By integrating and automating processes with this highly flexible enterprise-grade platform, you also enjoy ease of maintenance and benefit from a high return on investment.

MAKE YOUR BUSINESS'S BOTTOM-LINE MORE PROFITABLE BY AUTOMATING THE FLOW OF DATA BETWEEN YOUR SAP BUSINESS ONE SYSTEM AND THE REST OF YOUR IT ASSETS
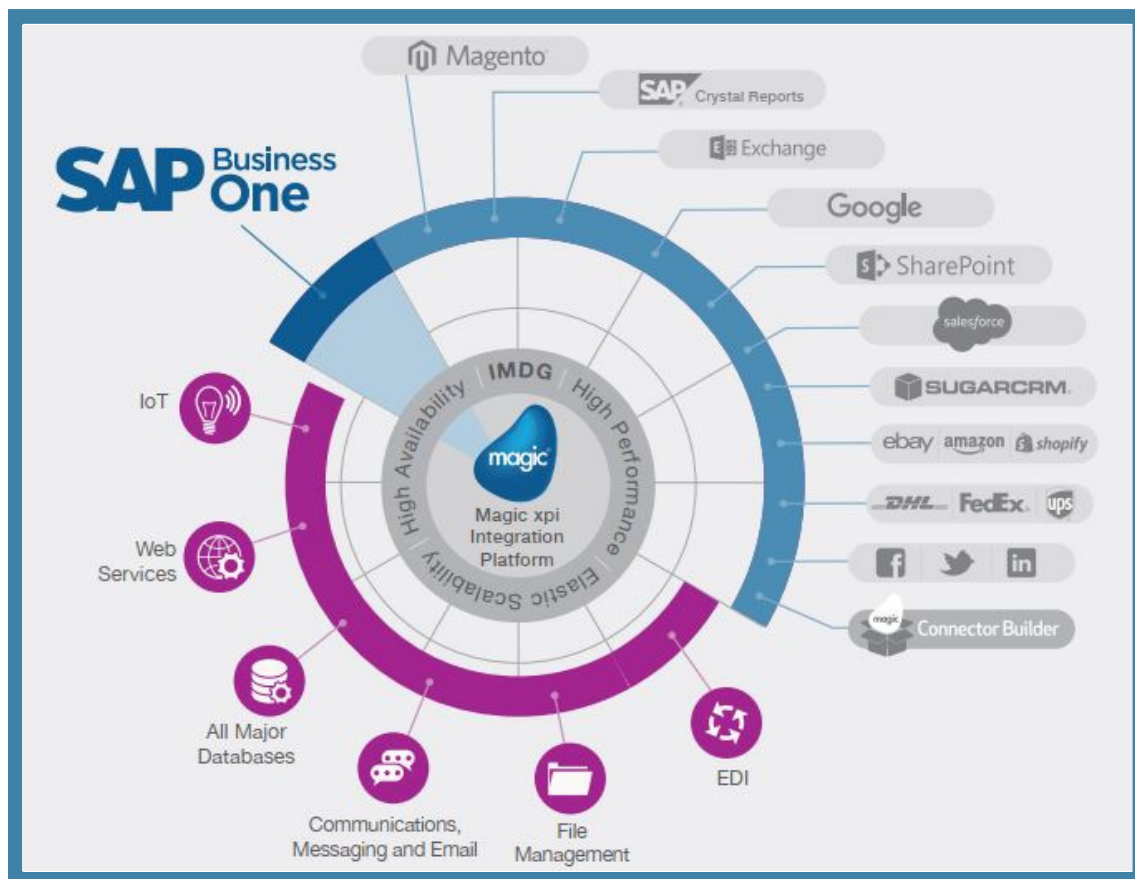

INTEGRATE YOUR SAP SYSTEMS

We provide everything you need to make your business processes run the way your business needs. IT, LoB and Management stakeholders benefit from:

- ☑ Flexible connectivity to different databases, file types and data formats.

- ☑ Fast time-to-market.

- ☑ Access to real-time data for accurate system information and better decision making.

- ☑ A single skill set for all integration needs.

- ☑ Easy and cost-effective maintenance

- ☑ Robust In-Memory architecture to support the most demanding applications.

- ☑ Business process automation for less than the cost of ETL.

MAGIC® XPI FOR SAP BUSINESS ONE INTEGRATION

Without any code at all, Magic xpi helps companies extend the capabilities of SAP Business One, by sharing information with other software or applications. You can also create real-time workflows triggered by actions within or external to SAP Business One to ensure that your business processes are fully responsive to your business needs.

Magic xpi's SAP Business One integration is typically used to share information with other software or applications, including email and eCommerce websites. The code-free platform can even be used to enable two-tier ERP.

MAGIC CODE-FREE INTEGRATION PLATFORMS CAN CONNECT **SAP BUSINESS ONE** TO AN ENDLESS COMBINATION OF ENDPOINTS.

MULTIPLE WAYS TO GET AHEAD

EDI2XML

Use Magic xpi for SAP Business One for:

e-Commerce Integration.
Timely and error-free transfer of information to and from many platforms such as Magento, eBay, Amazon, etc.

Courier Integration.
Accurate transfer of order information to your courier(s).

Supplier Integration.
Error-free import and maintenance of up-to-date supplier data into SAP Business One.

Inter-Company Trading.
Efficiency and accuracy improvements by automating processes between companies' business systems.

Enterprise Mobility.
Fast and reliable mobilization of SAP data and processes for use in Order Entry, Proof-of-Delivery, Field Service apps, and more.

WITH MAGIC, YOU'LL MAXIMIZE YOUR RETURN ON INVESTMENT (ROI) AND YOU'LL MAXIMIZE YOUR RETURN ON EXISTING INVESTMENT (ROEI), GIVING YOU THE FULL VALUE FROM YOUR EXISTING SAP BUSINESS ONE ASSETS.

MAXIMIZE YOUR ROI

Make sure your customers get exactly what they need, when they need it. By using Magic xpi, you'll gain capabilities impossible with SAP Business One alone, including eCommerce integration, intercompany trade and synchronization, master data synchronization, EDI, sharing of data across systems, and financial consolidation.

FRIENDLY, RIGHT-SIZED INTEGRATION

EDI2XML

Magic makes it simple to integrate what you want, the way you want:

- **Native connector** for optimized connectivity to SAP B1 fields and objects, even custom ones.

- **Full support** for SAP Business One and SAP Business One HANA implementations.

- **Full support** of real-time transactions.

- **100+ pre-built application** adapters and technology resources to connect tens of thousands of applications.

- **Magic xpi Studio** with code-free, drag and drop environment and comprehensive visual data mapper.

- **Multi-platform (Windows, Linux, AIX, Solaris, IBM i) Magic xpi Server** with real-time event triggers, powerful process automation scheduler, and automated handling of exceptions and errors.

- **Magic Monitor** with remote monitoring and management capabilities for IT and business users.

- **Enterprise-grade** including In-Memory Computing, built-in clustering and failover, powerful security and encryption tools, and SOA compliant.

- **Hybrid platform** supports any combination of cloud & on-premise integrations.
