FactoryEye
Industry 4.0 Made Easy

Let us show you how!

FactoryEye is a smart solution, made for manufacturers. It paves a clear roadmap for the digital transformation required for industry 4.0.

Our comprehensive solution provides manufacturers with real-time insights into their business. It enables you to make live, dynamic, proactive decisions based on your existing infrastructure, delivering tangible business results in each step.

And better yet, it does all this without changing your existing systems and infrastructure.

We get manufacturing.

Gain control of your factory, at a glance

Real-time visualizations of all production data and predictive alerts that prevent problems before they happen.

Manufacturing Business Optimization

FactoryEye unlocks your data, making all mission-critical and siloed data visible and available in real-time. Advanced analytics provides cost analysis, OEE improvement, vendor optimization, and much more.

Painless, Customized Implementation

With over 35 years of manufacturing expertise, our consultants implement a step-by-step plan to Industry 4.0 together with you.

Step-by-Step Plan to Industry 4.0 Excellence

Connect and Integrate

Automate business processes and orchestrate workflows to sync and streamline data from multiple silos.

Collect and Manage

Collect all data from mission-critical systems like CRM, ERP, SCM, PLM, and data from machines on the production floor. Presented in a single, unified view that provides solid insights with no data gaps.
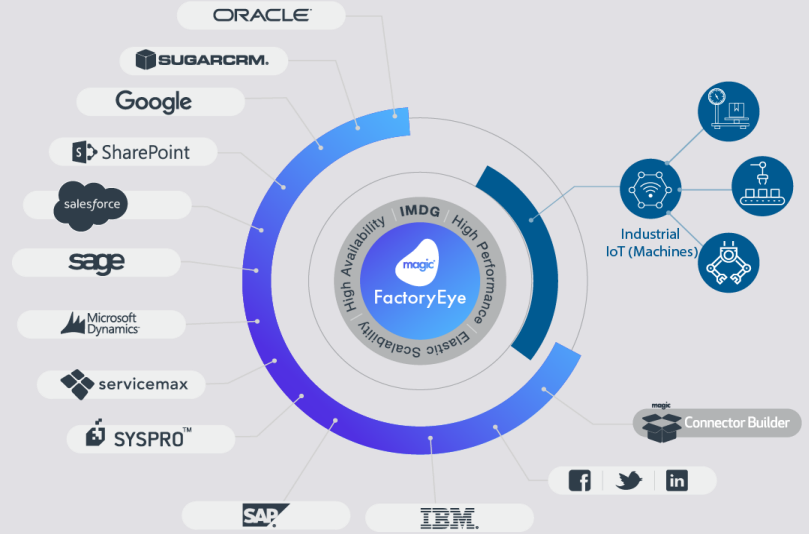

Visualize and Analyze

Stay on top of errors and inefficiencies by receiving alerts before your business is affected. Get a better understanding of real-time data trends and forecasts, enabling you to take action.

Identify and Optimize

Analytics proactively identify process intervention points, enabling live, informed decision making for optimizing business results.
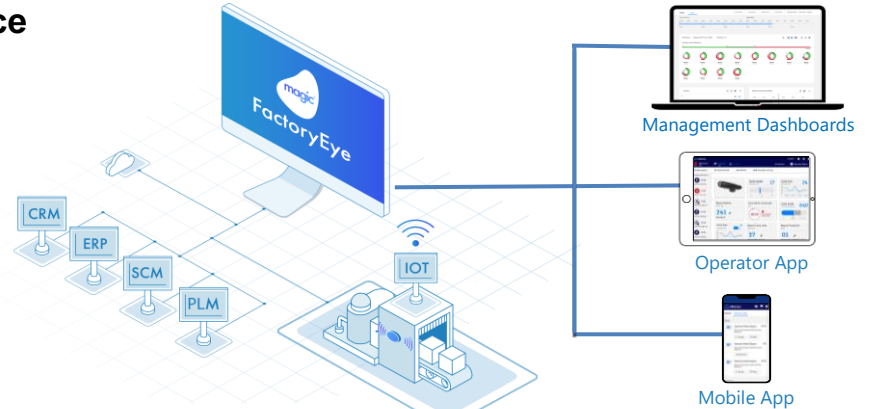

We make data work for you

FactoryEye offers full automation and connectivity, allowing your company to monitor and act upon data flowing between machines, devices, and people. All mission-critical and siloed data is visible and available in real-time.
